**Annual Faculty Scholars Reception
NYIT de Seversky Mansion**

Wednesday, May 8, 2013

Co-Conveners:

Rahmat Shoureshi, Ph.D.

Provost and Vice President for Academic Affairs

Barbara Ross-Lee, D.O.

Vice President for Health Sciences and Medical Affairs

Michael Uttendorfer, Ed.D.

Assistant Provost for Academic Affairs

Allison Andors, Ph.D.

Assistant Provost for Research and Director, Sponsored Programs and Research

NYIT's Faculty Scholars Reception is held each year in honor of full-time and adjunct faculty who have received an external or internal research, pedagogical, or infrastructural grant; published or edited a book or journal; published original research in a nationally recognized peer-reviewed journal or in a book; presented original research or creative work in a major public forum; produced a major creative work; obtained a patent; or received a prize or award from an outside organization honoring creative activity or scholarly attainment during the 2012 calendar year.

Foreword

“One's mind, once stretched by a new idea, never regains its original dimensions.”

This statement, attributed to Oliver Wendell Holmes, is almost mantra-like for those who grow ideas and thrive on discovery, dedicated to developing and uncovering new bases of knowledge through research. Universities are the repositories of past knowledge and are the literal and figurative laboratories and studios of the mind for future knowledge. In fact, a good university is an idea incubator, the zone of exploration where we promote new ideas, accept failure, reward

creativity, breed innovation, and foster interdependent learning.

We are here at NYIT in part because we celebrate scholarship and the life of the mind. And each year, it is rewarding to celebrate the faculty who have demonstrated through their scholarship and creative work the quality of our collective minds, shined the spotlight on our institution and enhanced its reputation through their work, modeled what is special about life at the university for our students, motivated our students with our accomplishments, and brought new and newer ideas to our classrooms, studios, and laboratories because we have been engaged in the creation of ideas.

I am proud to have been a little part of this celebration during my academic career and look forward to sharing many more reasons to toast what is very right about our NYIT and the Academy.

Wishing you continued success,

Edward Guiliano, Ph.D.

New York Institute of Technology

Foreword

At NYIT, student learning is the hallmark of our education and our highest priority. Many studies have shown that engaged inquiry has a profound impact on student learning. Scholarship and creative work provide an effective means of engagement among faculty and students, thereby, positively influencing the student learning. Therefore, we strongly believe there is a synergy between teaching and scholarship. Since scholarship and teaching are mutually sustainable endeavors, then by maintaining a healthy balance and integration of these two fundamentals of academia, NYIT students would be able to experience a positive reinforcement in

learning, and in turn will become productive and contributing professionals for the global community.

It is my distinct pleasure and honor to recognize NYIT faculty scholarship, which has not only resulted in their professional development and national and international recognition, but also has more importantly enhanced student learning at NYIT. I look forward to working with the NYIT faculty and students to further expand our scholarship and facilitate the development and recognition of a teacher-scholar model.

Welcome to this year's faculty scholarship event and enjoy reading and learning about the high-quality research and creative endeavors of the NYIT community.
